Github: <https://github.com/Sakura-hack01>

Email: saketdixit06@gmail.com
Mobile: +91-8601044086

SKILLS

Languages:	C++, Python, Java, JavaScript
Frameworks:	NodeJS, React, NumPy, Pandas, Scikit-learn, SciPy, TensorFlow, GPyTorch, XGBoost, BoTorch, Generative AI, OpenCV, Flask
Tools/Platforms:	MySQL, MongoDB, VS Code, Git, Power BI, Figma, Azure, AWS, Linux, Excel, Rest API Development, CI/CD pipelines
Soft Skills:	Problem-Solving, Team Player, Adaptability

PROJECTS

Materials Discovery | [Github](#) Jul '25 – Aug '25

- Built an ML-driven materials prediction system utilizing Bayesian Optimization and Active Learning techniques to significantly accelerate the research and discovery process.
- Optimized backend operations through parallelized computations and efficient resource management, successfully reducing query latency by 40% for faster real-time results.
- Deployed containerized Flask web services using AWS infrastructure to ensure high system reliability, dynamic scalability, and seamless user access under load.
- Collaborated within an Agile environment to rigorously refine API endpoints, ensuring robust performance consistency and smoother integration with frontend systems.

Agrisol – a prediction model for farmers | [Github](#) May '25 – Jun '25

- Developed a scalable web application integrating a Random Forest regression model via Flask APIs to facilitate real-time and accurate crop yield forecasting.
- Designed efficient data structures for data preprocessing and feature selection pipelines, ultimately improving runtime execution performance by approximately 98%.
- Automated end-to-end model evaluation workflows using Python and SQL, while visualizing key analytics via Power BI to aid agricultural decision-making.
- Implemented advanced hyperparameter tuning and cross-validation techniques to enhance model accuracy, processing large datasets to generate precise and reliable yield predictions.

TRAINING

Data to Insights-a hands-on approach to Data Science | [Certificate](#) Jun '25 – Jul '25

- Completed a comprehensive 60-hour Data Science curriculum covering MySQL, Excel, Power BI, Python, and Machine-Learning with a production focus.
- Analysed and processed over 1,000 data points using advanced SQL queries and statistical methods to strengthen data quality and model readiness.
- Constructed a machine learning model to forecast crop yield with measurable accuracy, applying supervised learning, hyper-parameter tuning, and rigorous validation.
- Delivered a full-stack solution by integrating the prediction model with Flask and Power BI visual analytics, enabling interactive agricultural insights.

CERTIFICATES

- | | |
|--|---------|
| • Introduction to Cloud Computing – NPTEL | Nov '25 |
| • Introduction to Hardware and Operating Systems - IBM | Sep '24 |
| • The Bits and Bytes of Computer Networking – Google | Aug '24 |

ACHIEVEMENTS

- | | |
|---|---------|
| • Secured Global Rank 700rd:
Among 10k+ participants in AtCode Contest | Nov '25 |
| • Secured Global Rank 7232rd:
Among 701k+ participants in Leetcode Bitwise Weekly Contest 139 | Sep '24 |

EDUCATION

- | | |
|---|-------------------|
| Lovely Professional University | Punjab, India |
| • Bachelor of Technology - Computer Science and Engineering; CGPA: 7.0 | Aug '23 - Present |
| Saraswati Vidya Niketan Inter College | Arjun Nagar, Gola |
| • Intermediate; Percentage: 87.80% | Jun '21 – Apr '23 |
| Saraswati Vidya Niketan Inter College | Arjun Nagar, Gola |
| • Matriculation; Percentage: 93.4% | Apr '20 – Jun '21 |
